EXCLUSIVE PROMOTION

Setting New Standard for Performance

SIGNIFICANTLY REDUCED SERVICE TIME

5 minutes compared to 45 minutes on average for other AODD Pumps (Air Side)

REDEFINED PERFORMANCE

- The 1.5" model has an average of 34% less air usage per gallon than the E40
- The 2" model has an average of 39% less air usage per gallon than the U2

ENGINEERED FOR LONGER LIFE & LOWER COST OF OWNERSHIP

- 80% increased displacement per stroke vs. E40, enhanced suction performance, 12% increase vs. E40
- 54% increased displacement per stroke, 31% increase vs. E2

Efficiency as measured by gallons pumped per cubic foot of air. Comparisons made using published performance data at max flow rate and using comparable materials unless otherwise noted.

CONVERSION MADE EASY
